We are very proud to announce the release of the next version of the FlexField FW v5.0 This version includes significant improvements and new functionalities. This release is an important step to cover the needs of our customers.

1. What is new in this release v5.0?

FlexField plus Onboard Firmware improvements

Note: The FlexField plus onboard Firmware improvements are described for the TS09plus with its Colour & Touch display. Most of the improvements are also available for the TS02plus and TS06plus with their monochrome displays.

2. What is new in this release v5.0?

FlexField plus Onboard Firmware improvements

Note: The FlexField plus onboard Firmware improvements are described for the TS09plus with its Colour & Touch display. Most of the improvements are also available for the TS02plus and TS06plus with their monochrome displays.

Survey & Quick Survey	New simplified tab distribution on Survey & Quick Survey menu, which is now more user-friendly. This in turn will increase the user's productivity. Define the command lines as you prefer, and make use of the new scroll bar, moving easily from the top to the bottom of the screen.

3. FlexField plus Onboard Firmware Bugfixes:

- Improved Leica Viva controllers Bluetooth connectivity
- Fixed Manage measurements access from Survey Menu
- Minor bug fixes

4. Update information

FlexField version 5.00 Build 389 can be loaded onto all FlexLine and FlexLine plus instruments with a valid software maintenance contract expiring **1st of September 2014 or later**.

5. Availability

The new firmware will be installed in production with immediate effect while instruments on stock will be shipped with the firmware version 4.0 Build 475. These units can be updated on demand via myWorld (https://myworld.leica-geosystems.com) to the latest version.
